

Call for solidarity from Milan

What's happening in Milan

Hi to everybody! A few words to explain what's happening in Milan since some weeks ago.

The housing problem is growing, of course because of the crisis and the laws of Renzi's gov. In march, infact, a law about house has been voted, the famous PIANO CASA, and in this law there are a lots of bad things to destroy the housing movements. BUT A THINGS THAT NO ONE SAYS, IS THAT THE LAW ALLOWS AND PROMPTS THE SELL OF PUBLIC HOUSES.

Nothings to help people, and a lots to help speculations. In this scenario, Milan is going to face local election, and the campaing to win has definitely started: in particular, Lega Nord party, in a big alliance with all the extreme-right parties, is doing all the campaign against migrants. This has exploded thanks to the media in a big discussion on the main stream that spreads shit on house movement, especially situation as SanSiro, a popular block where the number of occupation still grow. It's a way to remove legitimacy to whom demonstrate that there is another solution to solve crisis that do not propose austerity and privatizations.

The government of region Lombardia (Lega Nord), with Aler (who manage popular houses) and the mayor are saying that they will free the popular blocks from the occupations, because they said, who occupy is a criminal and stole the right to house to people waiting for a popular house: of course this is a lie, because Milan has more than 8000 popular empty houses, and 20.000 family are waiting, but they do not give it. Why? Because they are selling the popular to privates.

Tomorrow will starts the op against occupation, and this famous plan of 200 evictions: we're doing breakfast in the streets in different block to prevent the police and try to block the op.

ANY KIND OF SOLIDARITY IS SOOOOOOOOOO APPRECIATE! Maybe a text, or some banners, or pics with signs...

this happens today in the morning, the day before the op...
I'll send as soon as possible a translation of our texts...
